

# Dividing 3-digit numbers by 1-digit numbers (Answers)

Use Base 10 equipment to work out these divisions.

1)  $364 \div 3 = 121 \text{ r } 1$

$$\begin{array}{r} 121 \text{ r } 1 \\ 3 \overline{) 364} \end{array}$$

5)  $754 \div 5 = 150 \text{ r } 4$

$$\begin{array}{r} 150 \text{ r } 4 \\ 5 \overline{) 754} \end{array}$$

2)  $487 \div 4 = 121 \text{ r } 3$

$$\begin{array}{r} 121 \text{ r } 3 \\ 4 \overline{) 487} \end{array}$$

6)  $934 \div 4 = 233 \text{ r } 2$

$$\begin{array}{r} 233 \text{ r } 2 \\ 4 \overline{) 934} \end{array}$$

3)  $582 \div 5 = 116 \text{ r } 2$

$$\begin{array}{r} 116 \text{ r } 2 \\ 5 \overline{) 582} \end{array}$$

7)  $847 \div 6 = 141 \text{ r } 1$

$$\begin{array}{r} 141 \text{ r } 1 \\ 6 \overline{) 847} \end{array}$$

4)  $456 \div 3 = 152$

$$\begin{array}{r} 152 \\ 3 \overline{) 456} \end{array}$$

8)  $968 \div 8 = 121$

$$\begin{array}{r} 121 \\ 8 \overline{) 968} \end{array}$$
