

# Subtract with 2-digits (2)

Show each subtraction calculation on the number line.

Example:  $32 - 17 = 15$

a  $41 - 12 = \underline{\hspace{2cm}}$

b  $35 - 19 = \underline{\hspace{2cm}}$

c  $54 - 16 = \underline{\hspace{2cm}}$

d  $63 - 17 = \underline{\hspace{2cm}}$

e  $75 - 18 = \underline{\hspace{2cm}}$

f  $82 - 15 = \underline{\hspace{2cm}}$

# Subtract with 2-digits (2)

Show the calculations on the number lines by subtracting the ones first then the tens.

Example:  $32 - 17 = 15$

a  $43 - 15 = \underline{\quad}$

b  $37 - 29 = \underline{\quad}$

c  $63 - 36 = \underline{\quad}$

d  $74 - 28 = \underline{\quad}$

e  $86 - 38 = \underline{\quad}$

f  $62 - 45 = \underline{\quad}$
